

## PROFESSIONAL SERVICES

# Professional Services Consultant

Partnering with Illumio®, you have taken the first step in investing in technology that will transform your security posture. As part of the transition, we apply our expertise and best practices to analyze your existing environment and assist with the cutover.

The next step is to maximize your investment by engaging an Illumio Professional Services Consultant to help with project planning, technical design, implementation, integrations, system tuning, knowledge transfer, and workshops on reporting and event tuning – any set of tasks that is agreed upon and itemized on a Statement of Work.

## Key Benefits

- Provides the highest level of expertise with the Adaptive Security Platform® (ASP).
- Helps deploy, troubleshoot, monitor, and manage your ASP deployment and product upgrades.
- Works with your architecture team to design and develop a security policy framework based on Illumio best practice guidelines.
- Helps develop ASP-specific API scripts to optimize services.
- Prepares and maintains project documentation.
